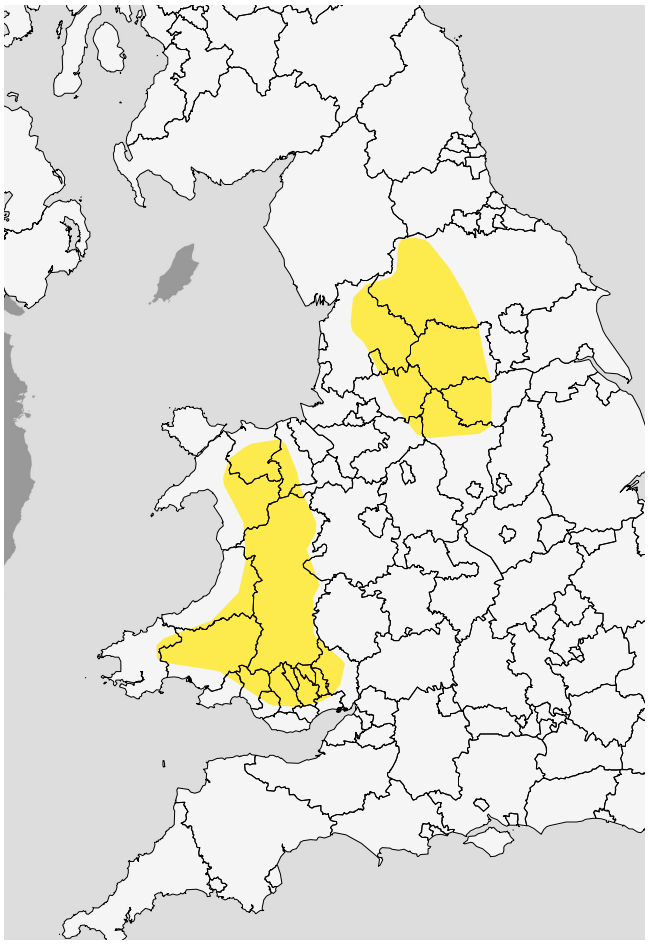
Yellow warning
Rain

Between
00:00 Sat 16 Mar 2019 and
23:59 Sat 16 Mar 2019



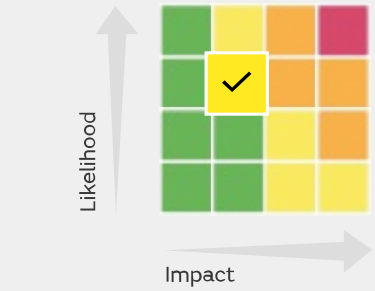
Heavy and persistent rain is expected to affect Wales and northwest England through Saturday, with the potential for some flooding.

What to expect

- Spray and flooding on roads probably making journey times longer
- Bus and train services probably affected with journey times taking longer
- Flooding of a few homes and businesses is possible

Further details

A developing area of low pressure is expected to track across Northern Ireland, northern England and southern Scotland on Saturday. In association with this, an extensive area of moderate to heavy rain will develop; the largest rainfall totals expected across the higher ground of Wales where over 100 mm could fall, this also accompanied by very strong winds. Elsewhere within the warning area, 40-80 mm is expected. Some uncertainty does remain however for the precise track of the low pressure, which will have a bearing on the exact locations which will see the heaviest rain.



Medium likelihood of low impacts

Issued at 11:07 Thu 14 Mar, 2019
